

AI++ FOR HONG KONG: FROM AI+ TALK TO REAL KNOWLEDGE POWER

Turning AI integration into Grounded
Organizational Strength

April 2, 2026
David Wong | COO

WHY AI++ MATTERS FOR HONG KONG NOW

Knowledge Management: The Strategic "First Win" for AI Adoption

GOVERNMENT MOMENTUM

HK Government --> the **"AI+" policy**

Targeting integration into over **200 public service procedures by 2027.**

KUBOT.AI ADVANTAGE

Providing a neutral, enterprise-grade AI Knowledge Refinement Management backbone that is reusable re-purposeable **stable and hallucination-free.**

SECTOR-SPECIFIC STRATEGIES

SECTOR	STRATEGIC STRATEGY
Government	Enhancing public service efficiency and policy navigation.
Legal & Finance	Ensuring data residency and hallucination-free compliance.
NGOs & FBBI	Streamlining operations and customer-facing interactions.

AI Evolution

The Progression Toward Autonomous, Action-Oriented Workflows

PHASE 01

RETRIEVAL

Utilizing **Retrieval-Augmented Generation (RAG)** and semantic search to establish a solid, factual Knowledge Management baseline

- > **Accuracy**
- > **Data grounding**

PHASE 02

GENERATIVE

Providing answers with **clear citations**

Moves beyond simple search to **synthesis** and **natural interaction**.

PHASE 03

AGENTIC

Moving from providing answers to taking **actions, decisions, and executing workflows** autonomously

OPENCLAW FRAMEWORK

AI++ Interaction Patterns

01

DISCRETE AI ↔ HUMAN

AI handles high-volume processing while humans provide the final layer of critical judgment.

- Automated retrieval & drafting
- Complex data summarization
- **Human-in-the-loop** approval

02

HUMAN ↔ HUMAN (AUGMENTED)

AI operates as a silent partner, surfacing knowledge during real-time human interactions.

- Real-time knowledge surfacing
- Cross-language translation
- **Relationship-first** approach
- **Vertical Knowledge Accumulation**

03

CONTINUOUS REFINEMENT

A closed-loop system where every interaction improves the organization's intelligence.

- Capture queries & corrections
- Automated content tuning
- **Self-improving** KM backbone
- **Reusable Skills and Workflows**

Challenges and Governance

Controlled Progression & Multi-Model Strategies = Success

THE RISK LADDER

LEVEL	CATEGORY	GOVERNANCE FOCUS
High	Agentic AI	Security, compliance, and autonomous boundaries.
Medium	Generative AI	Hallucination management and citation accuracy.
Low	Retrieval AI	Scope definition and data access control.

Rapid tool proliferation makes governance difficult; requires a **shared backbone** and a multi-model strategy to prevent model sprawl.

AI++ ARCHITECTURE

GOVERNANCE ESSENTIALS

- Granular Access Control & Permissions
- Comprehensive Audit Trails for AI Actions
- Strict Hong Kong Data Residency Compliance

Real-life Scenario

Empower Service with Real-Time Knowledge Support

CUSTOMER SERVICE COPILOTS

Providing instant access to **FAQs, complex policies, and service procedures**

Reduces response times

Ensures absolute consistency

SALES ENABLEMENT

Equipping sales teams with **instant playbooks and up-to-date pricing rules**

Act as critical copilot

Interaction backed by collective intelligence

UNIFIED KNOWLEDGE LAYER

Kubot.ai acts as the single knowledge layer

Ensures that every customer interaction is accurate and grounded in verified data

Streamline Bureaucracy & Enhance Ops Intelligence

LEARNING, ONBOARDING & EXPERT RETENTION

Every single employee interaction becomes future training data.
The organization stops losing its intelligence.

Phased Maturity Path

Start Small, Measure Success, and Scale Safely

PHASE 01

AI-ASSISTED RETRIEVAL

Focus on one domain. Implement semantic search to reduce "time-to-answer" for internal teams.

85%

Reduction in
Time-to-Answer

PHASE 02

GENERATIVE ASSISTANCE

Expand to multi-channel support with citations. Track workflow deflection and user satisfaction.

60%

Query Deflection
Rate reduction

PHASE 03

AGENTIC WORKFLOWS

Deploy narrow, guarded agents (OpenClaw-style) to handle self-generated processes and tasks.

0

Error

4DTech's AI++ Reality

Context: As an early adopter in HK, we faced intense AI hype pressure combined with heavily fragmented internal knowledge silos. We deployed Kubot.ai as our own KM backbone.

DRASTIC

Reduction in repetitive internal queries to HR and IT.

VASTLY

Shorter employee onboarding times and time-to-competency.

24 / 7

Uninterrupted, perfectly consistent support availability.

Spark Mission Resuable Practice

HK AI+ Policy + AiKM + Applied Case
= Make AI++ Real for HK

The Equation

THANKS!
